WORK EXPERIENCE

Junior Software Developer Intern | Angel Infotech Pvt. Ltd. **Jan 2025- Jun 2025**

- Gained hands-on experience in web development, working on multiple real-world live projects from development to deployment.
- Contributed to **live product launches** by writing clean, scalable code and performing pre-release testing and performance optimization.
- Built and maintained modular, reusable **frontend components using React.js**, adhering to performance, scalability, and maintainability standards.
- Collaborated with senior engineers in an **web development environment**, participated in **code reviews**, and followed **clean code principles** to ensure quality and consistency.

Freelance Frontend Developer **July 2025- Present**

- Successfully delivered a full-stack web solution for a Chartered Accountant firm as part of a two-member freelance team—**frontend handled solely** by me.
- As my **first freelance project**, I gained extensive hands-on experience building a complete frontend from scratch using **modern web technologies**.
- Gained confidence in building **responsive and scalable** interfaces optimized for usability across desktop and mobile devices.
- Learned how to **gather user requirements effectively**, communicate clearly with clients, and deliver a product that meets their expectations—**ensuring client satisfaction**.

PROJECTS

CallerBot.io | Frontend Developer Intern | Angel Infotech Pvt. Ltd. | [Go live](#) **May 2025 - Jun 2025**

- Built a 100% responsive, mobile-first UI using React.js, Tailwind CSS, and ShadCN UI, ensuring seamless performance across devices and screen sizes.
- Improved SEO performance by 70%, optimizing metadata, structured content, and semantic HTML to enhance Google search visibility and indexing.
- Ensured Lighthouse scores above 90+ for performance, accessibility, best practices, and SEO—meeting standards for production launch.
- Tech Stack: ReactJS, Tailwind CSS, Lucide, ShadCN.

Outsourced Financial Services (OFS) | Freelance Frontend Developer | [Go live](#) **July 2025 - Present**

- Created a responsive landing page with three tailored forms for organization queries, CA applications, and customer requests.
- Developed a secure admin dashboard with separate views for each query type, offering real-time visibility and control over submitted data.
- Implemented advanced data operations, including Excel export, user search, and deletion, all from a clean React-based UI.
- Tech Stack: React.js, Tailwind CSS, Lucide React, Laravel and Other UI Libraries

Certifications

- **Full Stack Java Developer** | Naresh I Technologies | Jan'24
- **ReactJS Development** | Great Learnings | July '24
